Professional Summary

I developed my first websites when I was only 16 years old using plain HTML. I achieved this by opening the website's source code and testing the code through trial and error. This was an amazing experience to start learning. I am 32 years old now, and my skills as a web developer, combined with my capacity for collaborating with other professionals, allows me to be a strong front-end developer.

Tools

- Working knowledge of HTML5, CSS 3 and JavaScript
- Knowledge of Node.js, Git and Sass
- Experience with responsive web design and mobile first programming
- Knowledge of Adobe Photoshop, Adobe InDesign and Adobe Illustrator
- Knowledge of graphic design, typography and user experience

Experience

November 2014 – Present

Web Developer Freelancer
- Develop websites for small companies in my region
- Manage the whole process:
  - ✓ Find new customers
  - ✓ Plan and wireframe websites
  - ✓ Develop websites (most of them using WordPress)
  - ✓ Launch websites.
